ClaimSync

Your Cloud Partner Platform — From Local Engine to SaaS

Reseller Partner Briefing | Saleem | March 2026

Your Facilities	Files Synced	Daily Pull	Your Revenue
2 Active	**437+**	**07:00 UAE**	**xx%**
MF2618 + MF5360	*100% Success Rate*	*Auto to your Reggr*	*Per facility onboarded*

What Changed — Your Old Workflow vs Now

OLD — Local Engine on Your PC	NOW — ClaimSync Cloud + Your Portal
• Run exe manually every day • Check files in local folders yourself • Call Anbu if something goes wrong • No way to see what Shafafiya returned • Re-run requires manual intervention • One facility at a time, one PC dependency • No audit trail if client questions a file	✅ Azure runs automatically at 06:00 UAE daily ✅ Files arrive in Reggr\ at 07:00 UAE — same folders ✅ Your portal — monitor runs yourself 24/7 ✅ See exactly what Shafafiya returned per 2-hour window ✅ Trigger any re-run yourself — any date, any facility ✅ Unlimited facilities — all under your reseller account ✅ Full audit trail — answer any client question instantly

Your Portal — What You Can Do Right Now

📊 Monitor	🔍 Audit	▶ Control
• Dashboard — recent runs across all facilities • Per-facility run history — last 10 runs • Status: Success / Failed + file count • Files tab — every file downloaded • Auto-refreshes every 30 seconds	• Intervals tab — 24 x 2-hour windows per day • Green = files found, grey = empty window • View SOAP XML — exactly what Shafafiya returned • Request vs Response side-by-side • FileIDs, record counts, timestamps	• Adhoc Run — any facility, any date range • Trigger without calling Anbu • Export file list as CSV • Onboard new facility — 5-step wizard • Add to existing group OR new client

Your Files — Still in the Same Folders on Your PC

Folder on Your PC	What's Inside	When It Arrives
Reggr\claimsync_pull_YYYY-MM-DD.log	Central pull log — all facilities	Daily at 07:00 UAE
Reggr\mf2618\claims\	H* claim XML files — Mediclinic	Daily at 07:00 UAE
Reggr\mf2618\remittance\	RA_* remittance response files	Daily at 07:00 UAE
Reggr\mf2618\resubmission\	RSB* resubmission files	Daily at 07:00 UAE
Reggr\mf2618\search_history_*.xml	Per-interval SOAP audit XMLs — validation	Daily at 07:00 UAE
Reggr\mf2618\logs\	downloadlog .log + .csv — file manifest	Daily at 07:00 UAE
Reggr\mf5360\ (same structure)	All MF5360 files — same layout	Daily at 07:00 UAE

Same files. Same folder structure. Just arriving automatically without running the local engine.

Your Revenue Model

Per Facility Subscription	Revenue Projections
AED 499 / month — Starter plan AED 999 / month — Pro plan **Your share: xx% per facility you onboard** Paid monthly, recurring, passive	

Next Steps — This Week

#	Action	Who	When
1	Continue using Reggr\ folders — local engine becomes backup only	Saleem	Now
2	Log into portal daily to monitor MF2618 + MF5360 runs	Saleem	Daily
3	Onboard 1 new facility as POC — use New Client wizard	Saleem + Anbu	This week
4	Share reporting requirements — what do your clients need?	Saleem	This week
5	Review portal together — confirm all features working for you	Saleem + Anbu	This call
